

Tri d'images :

Découpe les images suivantes et trie-les : d'un côté celles qui présentent une symétrie, de l'autre celles qui n'en présentent pas.

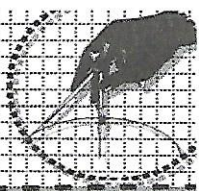

CM

Fiche 11

A large grid of dots for a geometry exercise. A vertical line is drawn through the grid, acting as an axis of symmetry. To the right of this axis, the letters 'K' and 'S' are drawn. The 'K' is composed of several line segments: a vertical stem on the left, a horizontal bar in the middle, and two diagonal arms extending to the right. The 'S' is a large, stylized letter with a central diamond-shaped hole. The grid extends to the left of the axis, providing space for the student to draw the mirror image of the letters.
